The Routes; the routes from the Middleware

Under Controllers:
- CRUD functions
- Listings, client, controller
- Handling async, calls for errors
- Show that requests are currently loading

Under Views:
- create -listing. client
- edit -listing. client
- list -listings. client
- map -listings. client
- view -listing. client
- index. html

Under Routes:
- States (listings. list, listings. map, listings. create, listings. view, listings. edit)
- Listings. client. routes.
